

The Elbow Luer Connector Male is a male Luer to single barb connector especially designed for the ibidi Heating System, Universal Fit in combination with the ibidi Pump System. It fits optimally in all μ -Slides with female Luer adapters placed in the heating stage on the microscope. Apart from that, the Elbow Luer Connector Male may be used in any other combination connecting a female Luer adapter to a tube.

Material

The Elbow Luer Connector Male is produced of polyethylene. The material is tested for cell growth compatibility. The Elbow Luer Connector Male can be sterilized by ethylene oxide gas or with ethanol. Autoclaving is not possible.

Applications

The Elbow Luer Connector Male can be included in any connection between a female Luer adapter to a flexible tubing with an inner diameter of 0.8–1.6 mm. The very low height is especially designed for the application to μ -Slides in combination with the ibidi Heating System, Universal Fit.

Specifications

Suitable for: Female Luer adapters Inner diameter: 2 mm Single Barb Suitable for: Flexible tubes, ID 0.8–1.6 mm Inner diameter: 0.8 mm General Total height: 18 mm Angle 90° Temperature stability: Up to 80°C/175°F (not autoclavable) Material: Polyethylene Color Natural Resistant to: Ethanol Max. pressure 500 mbar			
Inner diameter: 2 mm Single Barb Suitable for: Flexible tubes, ID 0.8–1.6 mm Inner diameter: 0.8 mm General Total height: 18 mm Angle 90° Temperature stability: Up to 80°C/175°F (not autoclavable) Material: Polyethylene Color Natural Resistant to: Ethanol	Male Luer Adapter		
Single Barb Suitable for: Flexible tubes, ID 0.8–1.6 mm Inner diameter: 0.8 mm General Total height: 18 mm Angle 90° Temperature stability: Up to 80°C/175°F (not autoclavable) Material: Polyethylene Color Natural Resistant to: Ethanol	Suitable for:	Female Luer adapters	
Suitable for: Inner diameter: General Total height: Angle Temperature stability: Up to 80°C/175°F (not autoclavable) Material: Polyethylene Color Natural Resistant to: Ethanol	Inner diameter:	2 mm	
Inner diameter: O.8 mm General Total height: Angle 90° Temperature stability: Up to 80°C/175°F (not autoclavable) Material: Polyethylene Color Natural Resistant to: Ethanol	Single Barb		
General Total height: 18 mm Angle 90° Temperature stability: Up to 80°C/175°F (not autoclavable) Material: Polyethylene Color Natural Resistant to: Ethanol	Suitable for:	Flexible tubes, ID 0.8–1.6 mm	
Total height: 18 mm Angle 90° Temperature stability: Up to 80°C/175°F (not autoclavable) Material: Polyethylene Color Natural Resistant to: Ethanol	Inner diameter:	0.8 mm	
Angle 90° Temperature stability: Up to 80°C/175°F (not autoclavable) Material: Polyethylene Color Natural Resistant to: Ethanol	General		
Temperature stability: Up to 80°C/175°F (not autoclavable) Material: Polyethylene Color Natural Resistant to: Ethanol	Total height:	18 mm	
clavable) Material: Polyethylene Color Natural Resistant to: Ethanol	Angle	90°	
Color Natural Resistant to: Ethanol	Temperature stability:		
Resistant to: Ethanol	Material:	Polyethylene	
	Color	Natural	
Max. pressure 500 mbar	Resistant to:	Ethanol	
	Max. pressure	500 mbar	

Instructions Elbe

Elbow Luer Connector Male

Ordering Information

The Elbow Luer Connector Male is available in a packaging size of 25 pcs.

Cat. No.	Description	Characteristics
10802	Elbow Luer Connector Male: Natural Polyethylene	sterilized

For research use only!
